## **DETAILED ACTION**

1. The petition of 4/15/2005, being granted, necessitates a new ground of rejection as follows.

## Claim Rejections - 35 USC § 112

- 1.5 The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 1. Claims 1-18, 23-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has provided no comprehensive definition of the term "inverted French F-channel". As such, determination of potential infringement is not possible. While applicant has attempted to work around this problem by using the terms "is defined to include" and "defined to comprise" in claims 1 and 23 without any definition in the specification, such action is not sufficient as the claims contain both the undefined term and further limitations of that term, those limitations may or may not be comprehensive to the term "inverted French F-channel", rendering the claims indefinite.
- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/696,342 Page 3

Art Unit: 3612

3. Claims 1-18, 23-25, 27-30, 32 are rejected under 35 U.S.C. 112, second paragraph, as

being indefinite for failing to particularly point out and distinctly claim the subject matter which

applicant regards as the invention.

Please see the discussion above regarding claims 1-13, 23-25.

Claim 27 is apparently incorrect as the ramp is not disclosed as a sliding-in/out accessory,

but rather a hooked on accessory, see hooks 1244.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 27-28, 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Nydam et

al.

Nydam et al. has stationary frame 21, support member as either 25, the wheels for the

drawer 28, or the rollers 40-45, etc., movable mounting frame 25, and drawer 28. "Drawer" is

deemed to be "a sliding, lidless horizontal compartment", Random House College Dictionary,

1978.

As to claim 32, see load-bearing surface 32,33 for the drawer wheels.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

Application/Control Number: 10/696,342 Page 4

Art Unit: 3612

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7. Claims 27-28, 32 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Nydam et al. in view of Johnson et al.

It would have been obvious to one of ordinary skill to provide in Nydam et al. sides to the dolly as taught by Johnson et al. in order to better contain load.

8. Claims 29, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nydam et al. in view of either Reed et al. or Ives et al.

Applicant's limitation to the ramp being a slide-in/out accessory is deemed incorrect. Should applicant traverse, specification support should be provided by page and line number. It would have been obvious to one of ordinary skill to provide in Nydam et al. a hooked on ramp as taught by either Reed et al. or Ives et al. in order to load the slide out accessory in horizontal extended bed orientation as seen in figure 1 of Nydam et al.

As to claim 30, the presence of the ramp does not eliminate the drawer 28 of Nydam et al.

## Allowable Subject Matter

- 9. Claims 1-18, 23-25 are allowed.
- 10. The following is a statement of reasons for the indication of allowable subject matter:
  Applicant's statement of common ownership is accepted to remove the Darbishire reference.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667. The examiner can normally be reached on 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn D. Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
